

TFS is focused on partnering with the industries premier manufacturers. We are a proud supplier of the following products:

Flotec

FSP

Rolled Media

The primary defense in industrial grinding and washer applications is rolled media. Total Filtration Services specializes in the identification of the proper source and type of media for your application. Our solutions will extend the life of your chemicals, tools and provide superior filtration.

These products are used in applications dedicated to:

- **Chemical**
- **Oil**
- **Water**

We only use media converters with direct mill relationships. We inspect and choose the best products to meet our customers specific application requirements.
