

Liquid Process

Total Filtration Services process filtration allows adjustments of flow rates, chemical compatibility and particle retention. The secondary defense in process fluid applications is to remove smaller particles.

Total Filtration Services carries a full line of process filtration, including:

TFS is focused on partnering with the industries premier manufacturers. We are a proud supplier of the following products:

- Bag Filters
- Bag Housings
- Pleated Cartridge Filter
- Cartridge Housings
- Depth Media & Cartridges
- Melt Blown Cartridges
- String Wound Cartridges
- Baskets & Strainers
- Pre-RO Filtration
- Reverse Osmosis Membranes
